EXPERTISE

- I believe my strengths lie in **training and development**. I have a strong desire to teach and especially help people.
- I want my expertise to align with my dreams and skills as a developer. My current focuses have been largely **Coldfusion** and **Vue** alongside **MySQL** and **MSSQL**
- I think something that will help is my **ability to learn quickly**
- As well as my **determination**
- Another key asset that will undoubtedly help along my journey is my **optimism**

WORK EXPERIENCE

Developer 1

Mind-Over-Data LLC

2022-2023

- Work:
 - FedEx - Editing and updating existing code to generate new yearly PDF files based on information from the client.
 - St. Jude - I worked in a VDI environment along side a senior developer to monitor daily files and report any errors, making minor changes using a FTP service when necessary.
 - QE - I worked within the Customer Service team to resolve any errors experienced by our clients within the TMS system.
- Familiar Languages:
 - Coldfusion - I've done a lot of work using ColdFusion/Coldbox
 - Vue - I've been learning more about Vue and have done some recent work with this frontend
 - React - Prior to my work at MOD this was the primary front end language I was learning
 - MySQL - I have a lot of recent work with MySQL and it isn't much different than MSSQL, which I'm more familiar with.
 - MSSQL - This has been my primary language working at MOD until recently.
 - C# - Lots of personal learning here. Similar to React

Assistant General Manager

Noodles and Company

2016-2021

- Team Management:
 - Oversaw a team of 7-10 employees daily within a larger restaurant group of 30 individuals at Noodles and Company.
- Training and Safety:
 - Collaborated with a Co-Assistant General Manager to train and maintain safety standards during the COVID pandemic.
- Operations Management:
 - Managed day-to-day operations, including team supervision, cash handling, and inventory control
- Adaptability and Safety Compliance:
 - Demonstrated adaptability in upholding rigorous safety protocols and ensuring employee and customer well-being.

Final Words:

As a junior developer, my journey is focused on continuous growth and becoming an exceptional professional in the field. In my recent role, I have embraced the analogy of being a Van Gogh in a world seeking a Devinci, recognizing the need to find the perfect environment where my talents can shine. While I acknowledge there is room for improvement and refinement, I am dedicated to investing the necessary effort and training to evolve into a highly skilled developer who can contribute significantly to your team.

In the words of Albert Einstein, "I have no special talents. I am only passionately curious." With my passion for development and unwavering curiosity, I am confident that I can overcome challenges, acquire new skills, and make valuable contributions to your organization. I look forward to the opportunity to showcase my talents and be part of a team that values growth, innovation, and excellence.
